Please note - If you are waiting for more than one test result, they may not all be reported at the same time.

DNA TEST FOR PRIMARY LENS LUXATION

Re: PLL10409 (Sundance Duffy)
Client: Kicki Kingelin

Dear Sir/Madam,

The result for your DNA test is:

Sundance Duffy - This dog is CLEAR of PRIMARY LENS LUXATION

This dog has two copies of the normal gene and will not develop PRIMARY LENS LUXATION as a result of the mutation we are testing for, although we cannot exclude the possibility they might develop lens luxation due to other causes such as trauma or the effect of other, unidentified mutations.

Your certificate is attached to this e-mail as a PDF

Certificates for this test are now being distributed by e-mail; we are no longer issuing these certificates by post. Your certificate is attached. PDF files can be opened and printed using Adobe Reader. If you do not have Adobe Reader then a copy can be downloaded free of charge from the internet by
